

“Life Is Laughin’ At Me”

09/14/21-01/10/22

01. "Battle Hymn"

02. "Tarsha"

Break it all down and put the sound in a blender and surrender to the night in question
just to testify

All of the answers are within ya

Beginning on a quest to find the next
directive actin' mesmerized

Tough to find a kindred sympathizer on the rise it's why i haven't had before and that's
irrelevant ta tries and so i'm

Pent up, bent up, and manipulated

Life is quite the trip i bet you
really Get to die so

Pry My Hope

My Rope

is selected

Get close enough to cut my throat

or close enough

to atone my

Cloak

And that's all she wrote 'cause

At your own funeral you walk like a ghost

Totally down for a

foundation hastened to a crowd and believed

But perceived: it's a lie

Drowned in the life of an inventor / adventure seeker

When i phoned in though

the beakers capsized right before my very eyes like a lion,

Rhino, i know the code so just

let me at the light it goes like

Zero-one-four-four, i can't say more or if i did it would wholly engulf and baptize so

Cut my throat
My rope
Release me
I know, believe me
The next time you see me you'll be
walkin' out of your own tv
Except in 3D
Cause at your own funeral you really talk the most

03. "Self-Reveal"

Sit alone in dark cold-
temperated room there comes a
saying
don't go crazy if for 2
A student of the languages the
Anguish set in when i just
Made you out of blueprints and it
didn't come true or come ta
life
And you walk around saying im wasted
Yeah, ur right
It could be a metaphor for
What you did delightfully
So tha stress-test measured on the high until i
won by raffle ticket with a
wicked grand prize

,,, Standin' on a razor's edge
,, Sleepin' with a
razor blade next to my bed
waiting for instead
Hating all the rest
So ready ta pledge it's why tha
Bed is on a ledge
It led to leading life in high-
res
It led to letting me be my best
And
I promise just to be less depressed if ya let me
rather than wakin' up covered in Sweat!

Glass toes x6
Those are what
point toward the emphatic souls
Rambunctious antivirus
can't be controlled
and it
Doesn't need a Host, and
Doesn't even glow when under a microscope, so
Hope is all i got when ya
Got that you're hopeless you just
see how it goes

,,, standin' on a razor's edge
,, sleepin' with a
razor blade next to my bed
Seeking for instead
Hating all the rest
So ready ta pledge it's why tha
Bed is on a ledge
It led to leading life in high-
res
It led to letting me be my best
And
I promise just to be less depressed if ya let me
rather than wakin' up covered in Sweat!

Glass toes x6
Those are what point toward the unfathomed souls
Glass toes x6
Those are what point toward the unbridled souls

,,, standin' on a razor's edge
,, Restin with a razor blade left in my leg
Waiting for instead
Hating all the rest
So ready ta pledge it's why tha
Bed is on a ledge
It led to leading life in high-
res
It led to letting me be my best
And

04. "Clone"

a ballad

from my palace
did i have it?
Yeah sure i had it
evil tried to lunge at it
tried to stab me and grab it
but i kept it by magic
it's how i went rabid
Drink from the chalice
Or drinking from a sleeved plastic
I'm still the same Royalty
and a loyalty addict
so i went to tha classes
And i studied you with glasses
Turns out
We were stuck in time lapses
Hinged at the beginning by a
Memorized passage

My toes
Point toward
My ghost

Who knows
How far this will go

Until then i'm scarred
reachin' for tha closest star

Time lapse true
Wanted to intensify and try to raise the bar
Wanted to defibrillate the heart but a whirlwind
Stirred in curvy and then imitated art
Dart to the beginning of time and you'll find i am
Thinking right about you while
Sitting in the dark
Carry around baggage that was added to your cart
Without credit or objective so ta
Pay in gift cards
Is reserved for hard times
And knowing that the part
Is played from cue cards
I stay mentally starved see it's

not just superman it's Clark
Kent to tha den when it's time ta embark unalarmed
Ya Walked out suddenly and left tha door ajar so i
Carved it in my skin because tha
wire was barbed
And harken
It's the invigorated carcass
Scarred and!
Reaching for tha closest star

My toes
Point toward
My ghost

Who knows
How far this will go

Until then i'm scarred
reachin' for tha closest star

My toes
Point towards
my close

Who knows
How far
this can go

Until then i'm scarred
Reachin' for tha closest star

05. "Inspector General"

Guess
what is on my mind
what is on the plate
who is on the phone for the lifeline
was it a magazine
was it a fantasy

was it a dvd
was it a date?

I

only called her back bc she
had a good taste
Wasn't into traps in the First place
she
didn't call me back bc she said she had
good way
but did you see her on a Thursday?

I

want her to explain because if that is not the case
Then i can stop feeling ever
slightly out of place
Hasten to the chase or on vacation choose a lake, and
Stick your head inside until your
eyes get glazed!
Then take a step back and
now you can relate
To me as i felt so low and
lonely in those days
Those are the times that your
mind innovates
Find and then break

She

Wanted the attention but she didn't pay the price
Wanted tha retention but decided on a heist
Wanted the enlightenment but
How do you
Keep up with life when you're
In Disguise!
.... Feeling for the night 2 am w the lights on
Now it's time ta Ride see
I had thoughts but they didn't coincide cause they
Fit into plans that were more bonafide
She
called me tha bananas and told me to take a hike
Told me that, i was mostly lower than a
Pike eating carp in a
Carved out horizon and why?
Because i really
didn't wanna die
Right
U can try that but atonement won't apply
Direction of perfection that you seek it is a
lie

Gouge both eyes
Why sharpen a sai?
Oh how you enervate

I
Wanted an incentive to remember my mistakes
But it feels like memories escaping when i
wake up plus from the night time prior i've been
hired on-call ta skim security tapes
She!
didn't seem to mind as her emotions ran away
In motion to the concourse so to
board the next plane on a
One way runway to someday
Happy as a covering for utter mundane

I
Had it as habit to exacerbate the strife, and
Lacerated at it with the back of kitchen knife in a
Night where where u get 1 try
and u cant seem to shake that your
mind is misplaced
She saw it as adventure and then dug a new
Grave
For me as a story to be gory on a
Page with a
Page turn and then u have blank
Lips sealed shut with a
Lot more to say...

06. "Tha Yip"

07. "Pig's Bath"

Yeah!
(and when i see u)
Yeah!

Standin' in a blast zone for days
i found you, doubting
I guess electrocution pays
Elocution laid out in
Evolutionary ways
Blackedout for days i guess tha Revolution
Paid off!
Cause it was right in our faces!
And it took us thru tha mazes amazed
dazed like a Sunday
Begging to tha universe
one day we switch places

I found grim
Sitting when
Gripping for tha closest gem
A won atonement in a
coating of supposed sin
I woke up hoping but a
loathing made me doze again
A bulldozer on tha road
Made me close the curtain
I was certain that i saw you in a purple and mint
Kinda hair but you
Vanished like tha
Magic Merlin
I guess you didn't wear glasses but i
imagined ya did
Oh what a habit we live...

I'd rather wake up beside you lookin'
slack in Berlin
Now we're back in person
But personified
You know it's like homicide
With tha back of your ear
On tha back of my neck
so i wanna saddle in
So certified, cause u would never burden my
Cup and with luck you will
Open up and take me back in
To tha hole in your heart..

Where i
dare start tha engine and it
Makes life padded

Yeah!

08. "Harvard High"

Kinda had hard days
Since tha start o' all days
So i wrote thru the hallways
During all tha ballgames
Livid in the fall days
Timid in the summer days
No longer a runaway
Go home and putt tha Callaway
Windows tinted with tha
Hopes to be shy
Me just walking with a
chance ta Collide
She's just talking now with-
out a proper right, cause
We went stalking and went
up to tha sky
I know it just wasn't my i-
magination right cause like
Stars were shimmering and
Dimming other light
In a tight
Space
You feel like u could die
In a wide space
You feel unalive

So distracted
It's like on a Monday
My mind can't tell tha day
I put on a funny face
Why show tha sad one
Women only run away
I would show tha money place
But i never had one

All i've got is slits of art with tha brush
Waiting on death ta make a finishing touch
Catching my breath cause a-
dept is so lush like
Running in tha stunning now
Plated gold clutch of a
shunning that tries ta last ur life and ur
Done
What do i pursue then
Clues under sun
Some under pressure and they turn to and run it cause
Might be the only possi-
ble Bargain

Yeah
And u extended ur life
For tha night

Waiting in forgotten pictures

Ta rise!

09. "Tribute"

I took a look at my door
that was a centipede
Told me that you
were not really into me
Told me i need to get a
Different entity
Then it proceeded to start the
Sentencing
1 2 3 yrs time
Well i guess it wasn't meant to be
Even a memory of mine
Held within a mind by an enemy
I guess that's the end of me
And now i'm imitating

I took a look at your eyes, it was like diamonds
i took a look at the prize
i couldn't find it
timing was everything a

line stood behind ya
wishing i could take this moment in
time and bind it
trying to be sound now and
in a round towel
i wrapped you in my head and i
couldn't get it out like a
leech in season, breathin' on a seam
politely comes the man with the im-
possible dream

How many mistakes does it take to get one?
Run in to ya and tha
Mind get
Done
Run from a Blazing Sun
With shoes on
Common aesthetic of a
Firstworld dump
Yeah gimme some
You Got what i want
Belle, you're just an elk on tha
Vitamin hunt once
Summed up
You arrive at the blunder in a
Clump
And now that's necessary dining

I took a look at your eyes, it was like
diamonds
i took a look at the prize
i couldn't find it
timing was everything a
line stood behind ya
wishing i could take this moment in
time and bind it
trying to be sound now and
in a round towel
i wrapped you in my head and i
couldn't get it out like a
leech in season, breathin' on a seam
politely comes the man with the im-
possible dream

10. "Green Pasture"

I went Crazy a while ago
I hate ta tell ya so
I fake Normal...

And when I turn around to tha
Thermal heating..
It's always kinda abysmal cause u weren't at the portal

I wanted to be nearest you and only you
I guess my own genetic coding will have to do
'cause
when i run the numbers and
crunch them like cucumbers

You always end up as tha proof

yeah

And we'll have it again
And we'll have it again

Sit up in my lap You're a diamond
You belong as mine for unwinding
But when i turn around to a sound like lightning
I find that i always had bad
Timing

And I'm Left with only writing

I'm caught in the grips of this service
Without a revolutionary purpose
And when i learned about it, it was dirt and uncertified
Murder my heart w that
And curse it

I Guess nobody goes to tha
Circus
anymore
And we'll have it again

11. "Incarnation"

Fly like a bat that just came outta lightning
Ur frightened like a cat that's
when i get to knifing
Lyrically spiking so
You stay spying
Where am i hiding ,ya
Might as well deny it
Buy me a drink and I just might
Spare you it's
true that
Top-tier heir's
What i compare to
and Dare you?!
I bet ya don't want a new hairdo
And heirloom winding up on you like a
Ne'er-do-well

Stories hard to tell
Yeah, Rather lock em in a cell
Come to my home and we'll
Have a Beef Wellington
And dine all night unless signify infidel, then
Call me with a bell or u call me fidelity
Call me like a chord that torn, supports a melody
Knowing that while forlorn you Botch Every
Live Broadcast when
Living From Hell

Stocked tha shelf with the
Medicine
Now deranged and estranged like a
bedouin
Never in time did i think i'd be severing
And now past 7pm
Guests say let me in

I hoist tha door w the leverage
Pass out beverages
Without sedatives

To friends and relatives
Not really kin
Cause enemies come in the form of
Skin

Inch kinda closer to what ya really meant
I leaned over and took a fisherman's crown, and
Woke up with sun above
Circling around
Never went past me and tried to go south
Look at Now
You
Seemed to have value
How you lost it was a salu-
tation
I'll be there to see it
In between shrouds
A Vampire waiting on tha
Wind ta die down

12. "Vestibule"

13. "Compliance Endkey"

i wish i could trade faces with you
then i get ta see grace and u
get ta see just how i lose
how i choose to live is kinda loose like a
fusion
Of a clueless and a bruiser
And an interviewer dude, so
Meet me at two
I have a whole set of blueprints that
apply ta only you

And i

didn't really have a life
That's why i stood by
Not wanting to say goodbye
I'd rather say
(Hello)

Yeah!

I wanna trade places
For once
Then u get to see tha chase
And i forget to see tha hunt
Lunge at me twice..
I'm a guy like
You can have exactly whatcha want
Just stay remembering
An infamy
and amenity as such
In a skylight
Of a fire like you i felt
A rush...
So i stood by
Never wanting ta say goodbye
'cause I'd rather say
(Hello)

Yeah!

Pine
Alive
Dine
Try
Drive
Slice
Fix that
Compromise
Wise
Strive
Glide
Size Large
Size Nice
Eyes affixed
But my eyes are on tha prize
Sized-up

Died
Came back ta life
I've
Been here before
Twice
Sight
Like
That of
Heightened
Night
Fine
I'll go crawl down aligned
Wound up inside
Your light like kaleidoscope
Tied up
So you can say i vied
Cried out tha Griffin from the side
I'm Left overnight
Left in a twilight behind ya
I'm sinking in a vice
And not thinking twice
'cause the first time is so polite

I'll be back then
Without decline
To take u as mine
In my mind
